Food Saver
(Final Presentation)

(Team 7)
Frank Dadzie
Sean Robinson
Javier Ortiz
Junghyun Kim

Recap

- Each year, 108 billion pounds of food is wasted in the United States. That equates to more than $408 billion in food thrown away each year.
  - Shockingly, nearly 40% of all food in America is wasted
- Food Saver is a project meant to reduce the overall waste produced from vendors being unable to sell products before their expiration date
- Vendors put up their discounted produce on Food Saver for local customers to view
- Buyers select a local shop of their choosing and get information such as the location and the items being sold at a discount

Functional Requirements

Vendor

- Create listings with image, price, description, and expiration date
- Remove listings past expiration
- Mark listings sold
- Update store address and name

Buyer

- Use GPS and maps to locate local vendors
- Browse catalog of local produce
- Use in app vendor information for contact and directions
